

Rockhouse Mountain Property Owners Association

The 8.5 by 11 topographical map shows the areas that we are evaluating as possible water source sites. Sites B and C are likely sites shown with a 1000 foot radius. Sites 1, 2, 3 are our existing well site, also showing a 1000 foot radius. There is room at this location for a fourth well, but it is our last choice. In both A and B we would need to construct an access road to the actual drilling area. Piping would occur in the existing road bed, and would vary only in the specific route from the well location into the existing system.
